APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
10/681,487	10/07/2003	Geoffrey Frank Deane	INOGN.006A	5894
20995 7590 01/11/2008 KNOBBE MARTENS OLSON & BEAR LLP 2040 MAIN STREET FOURTEENTH FLOOR IRVINE, CA 92614			EXAMINER PATEL, NIHIR B	
			ART UNIT 3772	PAPER NUMBER
			NOTIFICATION DATE 01/11/2008	DELIVERY MODE ELECTRONIC

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

jcartee@kmob.com  
eOAPilot@kmob.com

<b>Office Action Summary</b>	Application No. 10/681,487	Applicant(s) DEANE ET AL.	
	Examiner Nihir Patel	Art Unit 3772	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 10.22.2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 8-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 8-16 is/are allowed.
- 6) ☐ Claim(s) \_\_\_\_\_ is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims 11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims **10-16** are rejected under 35 U.S.C. 103(a) as being unpatentable over Czabala (US 6,346,139) in view of Hill et al. (US 6,651,658).

5. **As to claim 11**, Czabala substantially discloses a total delivery oxygen concentration system that comprises a frame having a support portion and a handle portion **11** (see **figures 1 and 2**), the support portion adapted to receive a portable gas fractionalization unit **10** (see **figure 2; column 4 lines 50-55**) for transporting the unit in response to force on the handle portion (see **column 55-65**); and a power supply mounted on the frame, the power supply having an A.C.

power input, a first power outlet adapted to charge a battery, and a second power outlet, adapted to power the unit (**see column 6 lines 4-20**), but does not disclose a frame that has a second support portion adapted to receive a battery wherein the second support portion comprises a battery bail configured to mate with a plurality of guide rails formed on the battery in a manner so as to secure the battery to the battery bail. Hill substantially discloses an apparatus that does provide a frame that has a second support portion adapted to receive a battery wherein the second support portion comprises a battery bail configured to mate with a plurality of guide rails formed on the battery in a manner so as to secure the battery to the battery bail (**see figure 3; column 8 lines 52-67**). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Czabala's invention by providing a frame that has a second support portion adapted to receive a battery wherein the second support portion comprises a battery bail configured to mate with a plurality of guide rails formed on the battery in a manner so as to secure the battery to the battery bail as taught by Hill in order to make it easier to replace the batteries when worn down.

6. **As to claim 12**, Czabala substantially the claimed invention; see rejection of claim 11 above, but does not disclose an apparatus wherein the first power outlet is adapted to electrically interconnect to the battery when the battery is secured to the battery bail. Hill substantially discloses an apparatus that does provide first power outlet is adapted to electrically interconnect to the battery when the battery is secured to the battery bail (**see column 8**). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Czabala's invention by providing a first power outlet is adapted to electrically

interconnect to the battery when the battery is secured to the battery bail as taught by Hill in order to make it easier to remove the battery when the battery is worn down.

7. **As to claim 10**, Czabala substantially discloses an apparatus wherein the frame has a second support portion adapted to receive a battery (**Since the batteries are located within the oxygen concentration unit, the oxygen concentration unit is defined as a second support portion adapted to receive a battery**).

8. **As to claim 13**, Czabala substantially discloses an apparatus wherein the first power outlet is adapted to charge a spare battery (**see column 6 lines 4-20**).

9. **As to claim 14**, Czabala substantially discloses an apparatus wherein the first power outlet is adapted to charge a battery mounted inside the unit (**see column 6 lines 4-20**).

10. **As to claim 15**, Czabala substantially discloses an apparatus wherein the power supply has a third and a fourth power outlet, each adapted to charge a spare battery (**see column 6 lines 4-20**).

11. **As to claim 16**, Czabala substantially discloses an apparatus wherein the power supply is sufficient to simultaneously power the unit and power the outlets for charging the spare batteries and the battery inside the unit (**see column 6 lines 4-20**).

12. Claims **8 and 9** are rejected under 35 U.S.C. 103(a) as being unpatentable over Czabala (US 6,346,139) in view of Hill et al. (US 6,651,658) and further in view of Miller et al. (US 4,545,790).

13. **As to claim 8**, Czabala/Hill substantially discloses the invention as claimed, see rejections to claims 7, 10 and 13-20 above, but does not disclose a handle portion that is configured with an extended position and retracted position. Miller discloses an apparatus that

doe provide a handle portion that is configured with an extended position and retracted position (see figure 1; **Figure 1 shows a rectangle cutout space around the handle 7; figure 1 shows that the handle 7 in an extended position; in the retracted position the handle 7 would be folded within the cutout space**). Therefore it would have been obvious to modify Czabala/Hill references by providing a handle portion that is configured with an extended position and retracted position as taught by Miller in order to assist the user in moving the portable oxygen concentrator.

14. **As to claim 9**, Czabala/Hill substantially discloses the invention as claimed, but does not disclose a mobility cart having a height no greater than 18 inches when the handle portion is in the retracted position. It would have been an obvious matter of design choice, since applicant has not disclosed that a mobility cart having a height no greater than 18 inches when the handle portion is in the retracted position solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with a mobility cart having a height no greater than 18 inches or any other numeric value.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nihir Patel whose telephone number is (571) 272-4803. The examiner can normally be reached on 7:30 to 4:30 every other Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Bianco can be reached on (571) 272-4940. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number:
